How to access –

Implementing different mechanisms of access in MENA-related repositories

Dr. Volker Adam, 26.04.2023, Antalya

UNIVERSITÄTS- UND LANDESBIBLIOTHEK
SACHSEN-ANHALT

DFG Deutsche
Forschungsgemeinschaft

Introduction

The Specialized Information Service (FID):

- Infrastructural project of the DFG (German research foundation, funding since 1998)

- Provides highly specialized research materials from the countries of the MENA region
  - Approx. 150,000 books in print
  - Hundreds of print journal
  - Negotiates digital licensing models with nationwide access for researchers

- Provides research-related services for scholars, research projects or German research institutes in the MENA-region (OA publishing on MENAdoc, digitisation projects, specialised advice on research data management)
  - Coping with non Latin scripts in the age of machine-readable editions
  - CARE principles for dealing with digitised cultural property from the MENA region in the digital age

Introduction

The Specialized Information Services (FID):
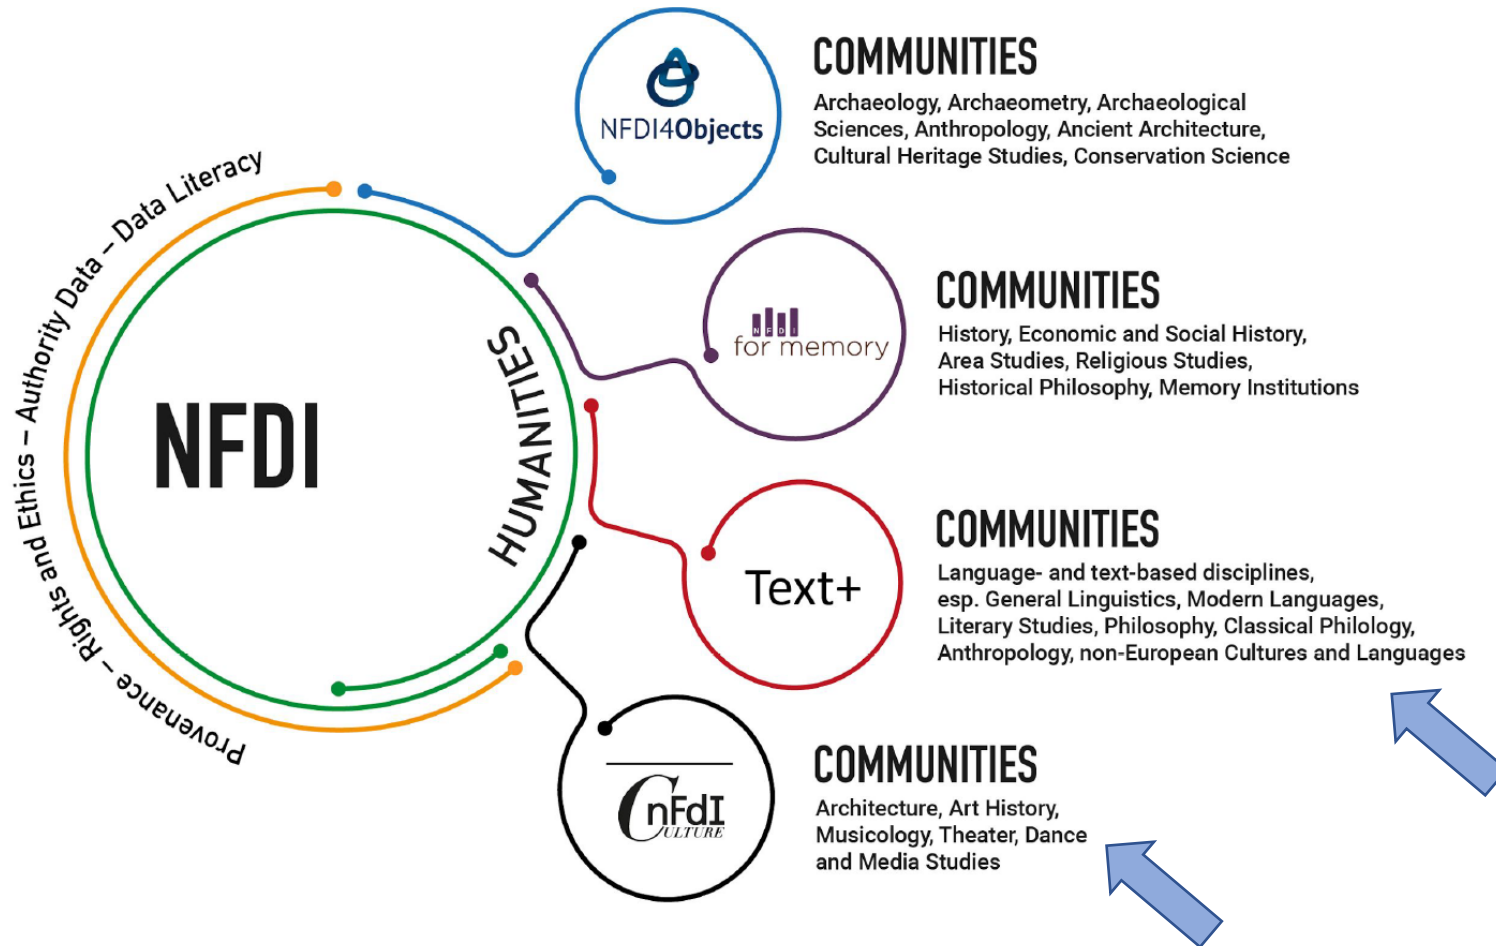

Regional Subject Information Services:

- African Studies

- Anglo-American Culture

- Asia

- Benelux / Low Countries Studies

- South Asia

- Latin America, Caribbean and Latino Studies

- Middle East, North Africa and Islamic Studies

- Northern Europe

- Eastern, East-Central, South-Eastern Europe

Humanities, Cultural and Social Studies:

- General and Comparative Literature
- Classical Studies – Propylaeum
- Book, Library and Information Science
- Performing Arts
- Finno-Ugric / Uralic Languages, Literatures and Cultures
- German Studies
- History
- Jewish Studies
- Communication, Media and Film Studies
- Art, Photography, Design – Linguistics
- Musicology
- Philosophy
- Religious Studies
- Romance Studies
- Slavonic Studies
- Social and Cultural Anthropology
- Theology
- Social Sciences
- Political Sciences

Introduction

COMMUNITIES

Architecture, Art History, Musicology, Theater, Dance and Media Studies

NFDI

HUMANITIES

Provenance – Rights and Ethics – Authority Data – Data Literacy

Introduction

- Specialised Information Service = diverse material from diverse sources, including research data

- Complications: unstructured data, multitude of writing systems, different DH competencies of the researchers

- Goal: to create a competence network involving the MELcom community in order to collect best practice examples on howe to cope with these digital challenges

Open Access

- Funding opportunities available to German and European libraries and researchers to promote Open Access

- Establishment of Creative Commons licences and the copyright notice on material not yet in the public domain or not available in Open Access

Open Access

Restricted Access

Closed Access

MENAdoc respository

= creates accessibility and permanent referenceability

Restricted Access

- Limits to making material accessible in Open Access:

  ➢ Digitised cultural heritage

  ➢ Material that is freely accessible but with unclear copyright

  ➢ Research data

Open Access
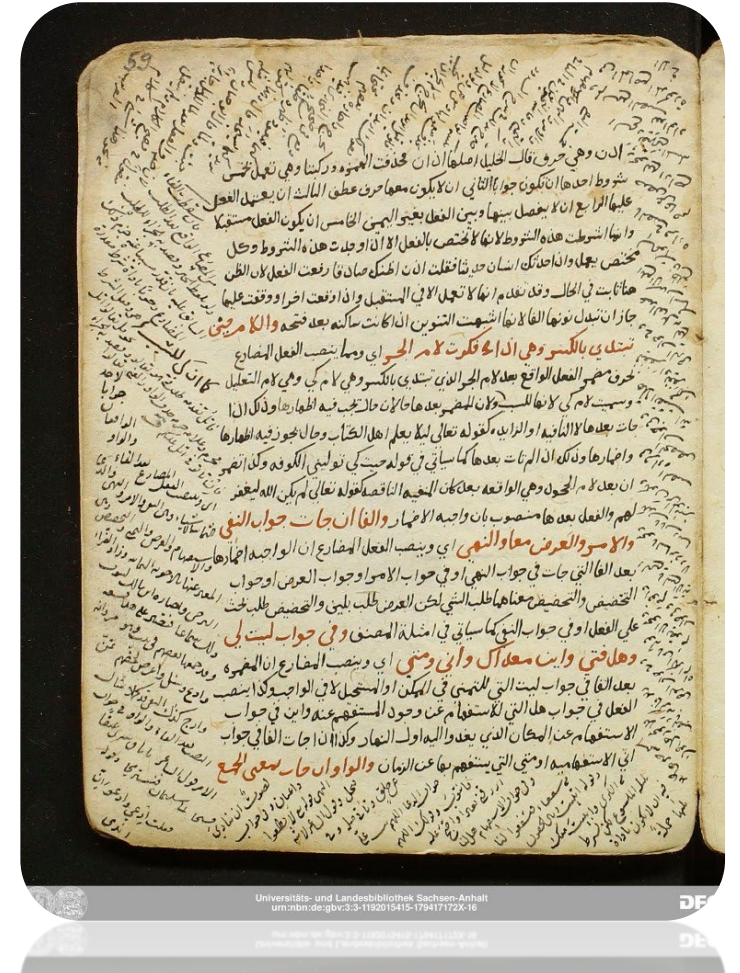

Restricted Access

Closed Access

Digitised Cultural Heritage

- Content is neither subject to data privacy nor copyright, e.g. historical manuscripts

- Material should still not be made accessible without the consent of the owning institution

Open Access

Restricted Access

Closed Access

Digitised Cultural Heritage

- No legal restrictions in Germany on making this material available in Open Access

- **But:** ethical and strategic reasons

Open Access

Restricted Access

Closed Access

C — Collective Benefit

A — Authority to Control
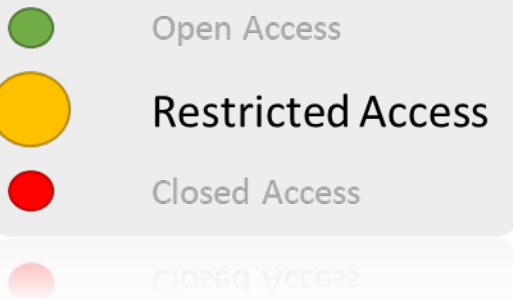

R — Responsibility

E — Ethics

Freely Accessible Material with Unresolved Copyright Issues

- Material was made freely available in electronic form

- Overlap with printed and purchased material

- **Positives:** less logistical effort, no high shipping costs, no physical delivery, no customs clearance, opens up storage place in libraries

- **Negatives:** does not meet our library standards: not accessible via a long-term repository, no PID, no OA licences

Open Access

Restricted Access

Closed Access

Freely Accessible Material with Unresolved Copyright Issues

О проекте

АБХАЗСКАЯ ИНТЕРНЕТ-БИБЛИОТЕКА – некоммерческий проект. Наша цель проста – собрать воедино доступные нам тексты об Абхазии и произведения абхазских авторов в одном месте.

Здесь вы можете прочесть художественные произведения, мемуары, научные статьи и книги – в основном по истории, этнографии, археологии Абхазии; работы по политологии; фольклорные материалы, труды, посвященные абхазскому языку, литературоведению, религии Абхазии и многое другое. Открыты также разделы "Искусство", "Учебники", "Периодика", "Естественные и точные науки"... Библиотека постоянно обновляется и пополняется. О последних публикациях вы можете узнать в разделе Новые поступления.

Абхазская интернет-библиотека не нарушает права авторов и владельцев авторских прав. Все электронные версии печатных изданий размещены на сайте исключительно в ознакомительных целях. Коммерческих целей мы не преследуем. Все права на книги принадлежат их авторам и издателям.

Если же издатели и авторы, произведения которых уже размещены здесь, против использования интернет-библиотекой своих материалов, просьба сообщить нам – и такие тексты будут немедленно удалены с сайта.

Пишите нам на адрес: apsnyteka@yandex.ru.

Closed Access

Freely Accessible Material with Unresolved Copyright Issues

- Several possible solutions:

1. Sole storage, no digital accessibility, printout possible

2. Storage and offline accessibility, no downloads, printout possible

3. Accessibility without download option for a defined user area, printout possible

4. Accessibility with download option for a defined user area

Research Data

- Restrictions on making research data available in OA:

  - Copyright restrictions

  - Ethical reasons

  - Caution on the part of the researchers

Open Access

Restricted Access
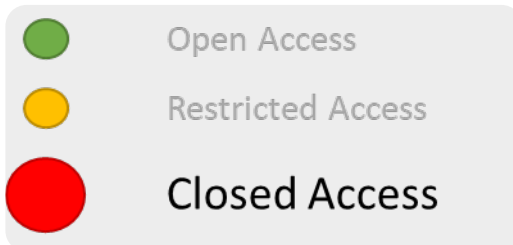

Closed Access

Closed Access

- Further limits to making material accessible in Open Access:

> Sensitive data and data protection restrictions

  - Endangering of informants and sources
  - Attracting unwanted attention on the institution

- Open Access
- Restricted Access
- Closed Access

Steps that need to be taken:

  - Anonymisation of sources
  - Storage in an inaccessible safe room

Summary

- Free accessibility on the WWW is not synonymous with Open Access,

- Re-use and further use of freely accessible material - data mining, dissemination, editing - must be clarified by the right holders

- Labelling of the material with the necessary licences to indicate the possibilities of further distribution and processing,

- Raise awareness among researchers to think about digital use agreements with rights holders at an early stage when "collecting" digital data,

- Libraries: develop a strategy for receiving digital cultural data from the MENA region and for implementing different access models,

- MELCom: information exchange on usage practices in the MENA region, best practice examples
