Muwatta' al-Imam Muhammad

The Muwatta by Muhammad ibn al-Hasan al-Shaybani is the transmission of the Muwatta of Imam Malik. This narration of the Muwatta of Imam Malik differs from most of the other transmissions in a number of respects. This fascinating manuscript is written in neat handwriting with margins full of annotations and commentaries. It provides not only a deep insight into the early community of the companions but also an insight into the early interaction between the Hanafis and Malikis.

Thank you!

Thank you all for listening, and thanks to all the organisers and contributors.
